## Introduction

---

The 77<sup>th</sup> Texas Legislature mandated that the Texas Juvenile Probation Commission (TJPC) annually provide a report to the legislature regarding statistical information relating to juvenile referrals. Per the Texas Family Code, Section 58.112, the report must include the ages, race and counties of residence of the youth transferred to a district court or criminal district court for criminal proceedings, committed to the Texas Youth Commission, placed on probation, or discharged without any disposition. This is the third report fulfilling that obligation.

The TJPC collects data electronically from all juvenile probation departments in Texas. Departments submit case file data through a CASEWORKER system developed by the TJPC, or through a system compatible with CASEWORKER developed by their individual county. All 254 Texas counties were able to submit their data electronically as required for the first time in 2001.

CASEWORKER was created by TJPC in 1985 to facilitate and standardize the collection, storage and retrieval of caseload information. In order to keep up with the changing system, the program has evolved through a number of revisions since it was created. The latest edition of the program, CASEWORKER/5, was released in the summer of 2003 and is utilized in 97% of the 254 Texas counties.

### Flowchart of Juvenile Justice Data

Juvenile activity occurs in communities where children are referred to the juvenile justice system

Data relating to activity is entered and managed in local juvenile probation departments (either using CASEWORKER or other compatible county system)

Data from each local department is submitted to TJPC to be maintained and analyzed in a statewide database

## Referral and Disposition Activity in 2002

\* Note: The chart on this page illustrates referrals that occurred in calendar year 2002 and dispositions that occurred in 2002. The juveniles included as referrals are not necessarily those disposed (i.e., a juvenile can be referred during one year and disposed of in another). Therefore, the number of referrals does not equal the number of dispositions.

There were 105,910 referrals to juvenile probation authorities in Texas. This is a decrease of 6.4% from 2001 (113,134 referrals), and the seventh consecutive decrease in total referrals since 1995. This decrease occurred while there was an increase (2.0%) in the projected juvenile-aged population based on Texas State Data Center projections.

More than 71% of all referrals in 2002 were male. The proportion of female offenders has gradually increased over the years – 24% in 1992 to 29% in 2002. Females comprised a larger percentage of the less severe offenses. Females committed 25% of all delinquent offenses and 47% of all CINS offenses.

While Anglo youth make up nearly half (44%) of the juvenile population, they accounted for only about one-third (34%) of the referrals. Hispanic juveniles were the second most populous group (40%) but accounted for the most referrals in 2002, 43%. African American youth constituted 13% of the population and 23% of the referrals.

The average age of juvenile referrals was 14½ years of age. However, sixteen-year-old youths were referred to juvenile probation more frequently than any other age juveniles.

More than half (54%) of the juveniles referred in 2002 were living with one parent, and one third were living with two parents. Most of the remaining youth lived with other relatives, such as grandparents or an aunt and uncle.

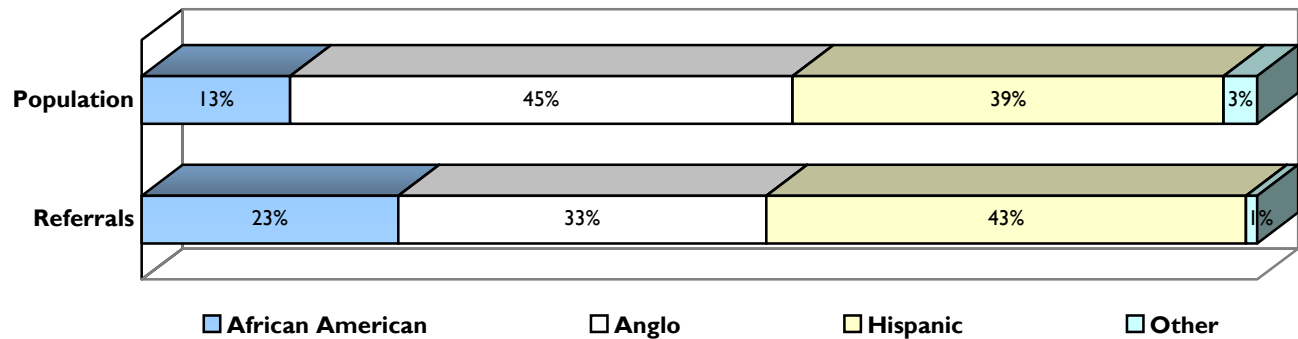

Over eight out of ten juveniles referred were attending regular school. The remaining juveniles were in an alternative education center, had been suspended or expelled, or had dropped out of school entirely.

### Race, Gender and Age of Juvenile Referrals in 2002

A comparison of the racial breakdown of the statewide juvenile population to the racial breakdown of referrals shows that African American youth are referred in higher proportions than their representation in the population. Anglo youth are more prevalent in the population than are referred. Hispanic and other youth are similarly represented in population and referrals.

**Race of Juvenile Population vs. Referrals**

A similar comparison of the gender of the statewide juvenile population to referrals shows males are referred in higher proportions than their representation in the population. While the population is nearly evenly split between males and females, nearly three quarters of referrals were male.

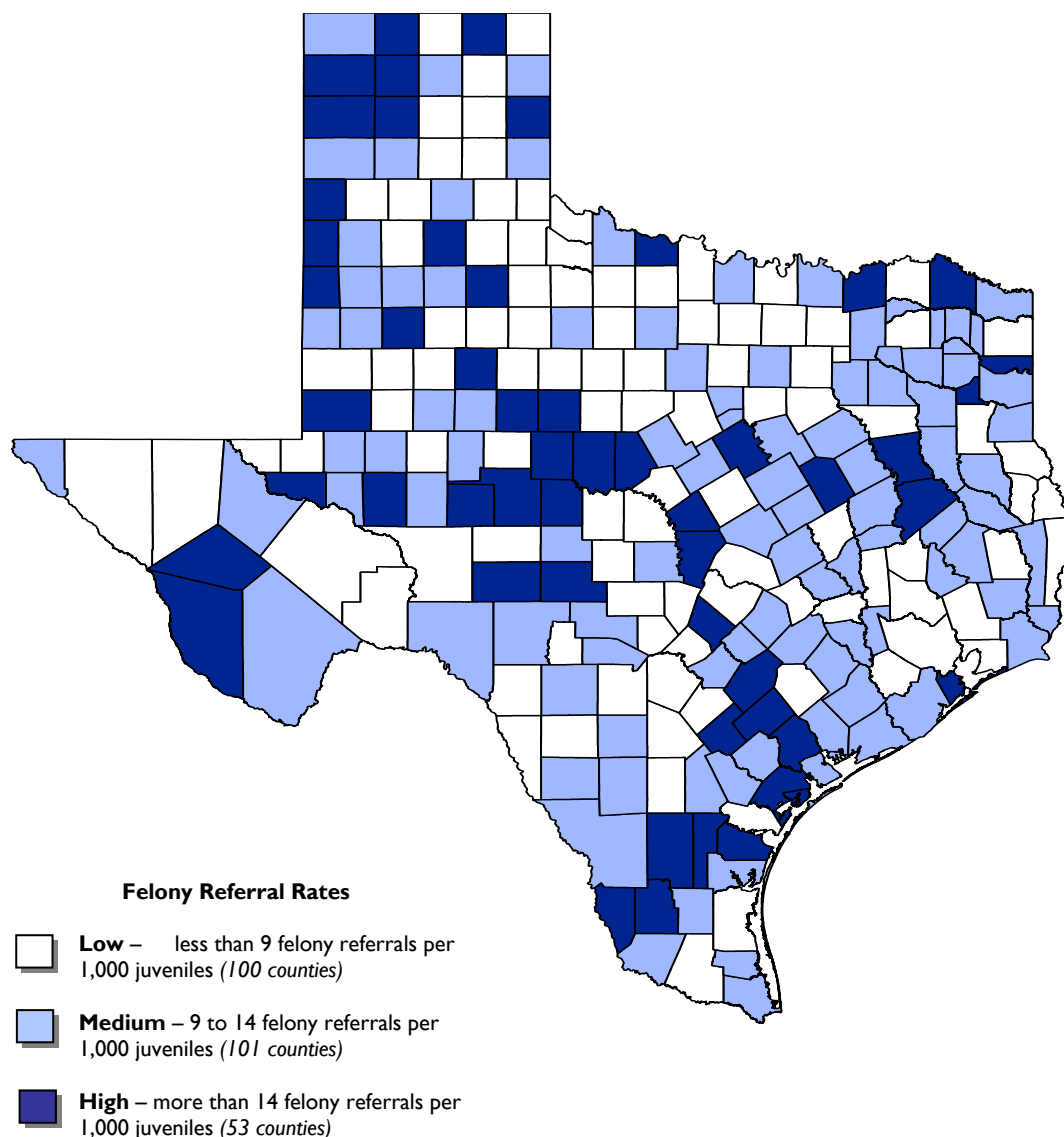

**Gender of Juvenile Population vs. Referrals**

The average referral rate in 2002 for Texas juvenile probation departments was 44.6 referrals per 1,000 juveniles in the population. The average felony referral rate in 2002 was 10.3 referrals per 1,000 juveniles in the population, with a range from zero to 41.6.

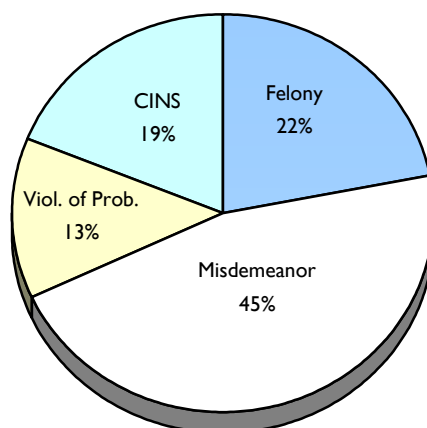

The following map illustrates felony referral rates for 2002 throughout the state. As illustrated on the map, high felony referral rates occur in all regions of the state. In 2002, none of the state's seven largest counties were considered to be within the high referral rate category. El Paso and Tarrant counties are in the medium-rate group, while Bexar, Dallas, Harris, Hidalgo and Travis counties are in the low-rate group.

**Felony Referral Rates per 1,000 Juveniles in 2002**

Referrals by Offense Type in 2002

The percent of referrals for alleged felony offenses has gradually risen over the past three years. The number of violent felony offense referrals increased from 6,344 in 2001 to 6,474 in 2002. Within this category, homicide and sexual assault referrals increased 43% and 10% respectively from 2001. The number of attempted homicide, robbery and aggravated assault referrals remained relatively stable.

The category of misdemeanor A & B violations (which also includes contempt of magistrate orders) has remained relatively consistent as a percent of total referrals over the past three years. Nearly half (45%) of all referrals in 2002 were for these alleged, non-felony delinquent offenses.

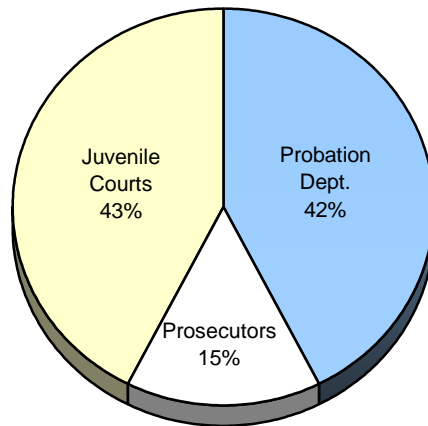

Violation of probation order referrals increased slightly in 2002 as a percentage of total referrals, although the actual number of violations of probation decreased from 13,664 in 2001 to 13,397 in 2002.

The number of CINS offense referrals decreased 17%, from 24,695 in 2001 to 20,508 in 2002. As a percent of the total number of referrals, CINS offense referrals have consistently decreased over the past three years. Within this category, the number of status offense referrals and the number of misdemeanor C and other non-status CINS offense referrals both decreased from 2001 by approximately 17%.

Source of Dispositions in 2002

Dispositions were made in 107,615 juvenile cases in calendar year 2002. Juvenile probation departments disposed of 45,677 of these cases, with 8,073 cases dismissed or withdrawn, 23,519 cases given supervisory caution, and 14,085 cases placed on deferred prosecution.

Juvenile prosecutors resolved an additional 16,181 cases. Prosecutors disposed of 1,463 cases with supervisory caution and 4,495 with deferred prosecution. No probable cause was found in 2,826 referrals, while 7,397 were refused and non-suited.

The remaining 45,757 cases were resolved by the juvenile court. Of these, the court ordered supervisory caution to 764 cases; deferred prosecution to 3,757 cases; adjudicated new or modified probation to 27,456 cases; certified and transferred to adult court 214 cases; adjudicated and committed to TYC 2,615 cases (2,464 with indeterminate sentences and 151 with determinate sentences); and consolidated, transferred, dismissed, or found not guilty 10,951 cases.
